

FitBuddy – AI Fitness Plan Generator

7. Project Documentation Phase

Documentation Objective

Documentation records the project purpose, architecture, workflow, technologies, functions, routes, user interface, testing, and conclusion.

Project Description

Document FitBuddy as a web-based application that generates personalized workout plans and nutrition/recovery tips using Gemini models.

Technical Documentation

Record the FastAPI backend, Gemini integration, Jinja2 templates, SQLite/SQLAlchemy database, project structure, setup commands, and environment configuration.

Workflow Documentation

Explain model selection, architecture, core functionality development, routes.py development, frontend development, and deployment.

Feature Documentation

Document workout generation, nutrition tips, feedback-based updates, database storage, and administrator view.

UI Documentation

Describe the home page, personalized workout result page, feedback page, and view-all-users page.

Conclusion

Document how the combined AI, backend, database, and frontend components provide an adaptive fitness-planning workflow.

Project: FitBuddy – AI Fitness Plan Generator using Gemini Models.
