

# FitBuddy – AI Fitness Plan Generator

## 8. Project Demonstration Phase

### Demonstration Objective

Demonstrate the complete FitBuddy workflow from entering user details to generating and updating a personalized fitness plan.

### Step 1 – Home Page

Open the application and show the input form containing name, user ID, age, weight, fitness goal, and workout intensity.

### Step 2 – Generate Plan

Submit the form and demonstrate the AI-generated 7-day workout plan.

### Step 3 – Nutrition Tip

Show the nutrition or recovery tip displayed with the generated plan.

### Step 4 – Feedback

Enter feedback about the existing plan and submit it to demonstrate plan refinement.

### Step 5 – Updated Plan

Show the revised plan and confirmation after the feedback is processed.

### Step 6 – Admin View

Open the view-all-users page and demonstrate the stored user information and original/updated plans.

### Step 7 – API Documentation

Optionally demonstrate the FastAPI /docs page for exploring and testing available endpoints.

### Final Demonstration Result

The demonstration should show that FitBuddy connects the frontend, FastAPI backend, Gemini AI services, and SQLite database into one working application.

**Project:** FitBuddy – AI Fitness Plan Generator using Gemini Models.
